

## Stay inspection-ready for TJC, DNV, and local jurisdictions

Passing your compliance inspections stress-free depends on how good your organization system is. Running and reviewing reports, organizing your binders, and pulling the correct information is crucial yet time-consuming.

FSI's eBinders will help you organize and keep track of your compliance reports & dashboards from one location within your CMMS. No need to print every report or let your binders pile up year after year. You can pull up any relevant documents using a user-friendly search function at any time—whether you're preparing for an inspection or talking to an inspector. Feel confident in your data accuracy and prepare for inspections in less than half the time using eBinders.

### Access compliance documents & dashboards in seconds

Created in collaboration with The Joint Commission Inspectors to make sure your healthcare facility passes inspections and stays 100% compliant at all times.

#### Eliminate physical binders

Store your data digitally in eBinders and have your entire facility history at your fingertips.

#### Run automatic reports

Let all your reports run at the same time every month and set statuses based on review needs.

#### Cut down on errors

eBinders automatically use a standardized naming conventions after every automatic report.

#### Search documents on-demand

Easily filter files by date, PM types, custom attributes, location, status, compliance indicators, and more.

#### Save significant time on reviews

Cut down on physically running reports and organizing binders to focus on getting inspection-ready.

#### Access organized digital binders

Create binders for TJC, DNV, local inspections, EPs, buildings, and more.

## Here's what our customers say

"FSI is a huge time saver and makes our hospital maintenance so much more efficient."

**Robert Boyce,**  
Facilities Engineering  
Operations Manager

"The cost value is incredible. You can eliminate Post-It Notes and handwritten notes and things of that nature."

**Mitch Gibson,**  
Director of Biomed

"The number of factors that I can filter through is far above supreme –I love the search function."

**Courtney Haschke,**  
Biomedical Supervisor

"FSI allows for incredibly accurate, actionable reporting. Our data is consistent across all hospitals."

**Jim Wicke,**  
Facilities System Analyst

"FSI has become our record-keeping and compliance backbone. We have a true partner in FSI."

**Robert Setters,**  
Plant Operations  
Manager

"FSI is really our Google. Gone are the days of paper records and file cabinets with stuff stored everywhere."

**Robert Boyce,**  
Facilities Engineering  
Operations Manager

## About us

FSI provides cloud-based computerized maintenance management software built for healthcare professionals. CMS manages over 650 million sq. ft. of facility space and surveys another 50 million sq. ft. every year to give you usable, useful operations management data. Adopt a comprehensive, intuitive, and scalable CMMS to empower your staff and optimize your operations.
