

Tired of your CMMS?

Switching has never been easier.

At FSI, we believe hospitals deserve more from their CMMS - it should be your one stop-shop for success. Say goodbye to clumsy interfaces, a tool that employees struggle to learn, or an unreliable support team that leaves you with never-ending questions. That's why we're making our software easier to attain for healthcare systems feeling left behind by their current providers.

FSI is making it easier than ever for hospitals to partner with the leading CMMS for healthcare system professionals.

FSI's Custom Maintenance Software (CMS) is built by and for healthcare professionals. From services, like on-site barcoding, to software helping you streamline and refine asset management, CMS offers everything a healthcare system needs in one suite of products.

Simple data migration

Data is at the heart of everything we do at FSI. We believe that having complete, accurate data is central to long term success, which is why we help new customers with data migration from their previous system every step of the way. We'll work with your team to ensure a seamless migration so there are no gaps in your organization's data.

Highly rated support

As you train employees and complete the implementation process, FSI supports your team with a three-pronged approach. First, our experienced, in-house support team is ready to answer questions and guide you during your transition. Next, our Customer Success team guides your long-term progress by ensuring you're reaping all the benefits CMS has to offer. Finally, our 24/7 online community, The Neighborhood, provides a platform to all FSI customers to share best practices and learn from peers in the industry.

Constant innovations

FSI has been in the healthcare industry for over 20 years by continuously evolving and adapting to the needs of hospitals. Our team is constantly developing customer-led improvements based on feedback from the hospitals we work with and emerging challenges and needs in the industry. With monthly releases and an open door to provide product feedback, you can depend on CMS to keep up with your team's requirements.

Here's what customers say about switching to FSI

"FSI's CMMS is miles better than what we were using. I continuously saw FSI and CMS coming up in conversation. People constantly mentioned how satisfied they were with the product. I never heard anything negative. It blows the competition out of the water."

Michael Bilodeau,
Business Operations Manager

"I love how user-friendly CMS is and how easy it is to add any line of data that I need for assets. That's been really key. I can go in and quickly add that user-defined field and it becomes permanent. That's been a huge lifesaver. It's definitely not something we could have done with our previous solution."

Courtney Haschke,
Biomedical Supervisor

"FSI has become the backbone of our record keeping and compliance documentation. When we went to market for a new CMMS we figured we'd find just another vendor. What we got was a true partner in FSI. They've taken ownership of our issues."

Robert Setters,
Plant Operations Manager

"With our old CMMS database, it wasn't possible to get data that we could believe in. Now we have a solid data platform on which to base decisions. We're can look at individual pieces of equipment and say, 'How many times has this broken down? What has the cost been?' We can rank equipment based on performance, and we prioritize replacements and capital investments."

Nick Zauner,
Executive Director, Facilities Engineering

About us

FSI provides cloud-based computerized maintenance management software built for healthcare professionals. CMS manages over 650 million sq. ft. of facility space and surveys another 50 million sq. ft. every year to give you usable, useful operations management data. Adopt a comprehensive, intuitive, and scalable CMMS to empower your staff and optimize your operations.
